Tested in accordance with BS EN388:2016	Requirement	Level
	(6.1) Abrasion resistance	2
	(6.2) Blade cut resistance	1
	(6.4) Tear resistance	3
	(6.5) Puncture resistance	2
	(6.3) TDM Cut resistance	X
	(6.6) Impact protection	

BS EN 388:2016+A1:2018

BS EN388:2016 levels are based on the table below:

TEST	PASS	NOT TESTED / FAIL				
Impact protection ⁴	P	<BLANK> - No code or text is added if not tested or test failed				

See notes overleaf

Test results relate to the palm area of the glove unless otherwise stated

NOTE 1: For dulling during the cut resistance test (6.2), the coupe test results are only indicative while the TDM cut resistance test (6.3) is the reference performance result.

NOTE 2: There is no correlation between the levels of performance obtained with the 6.2 and 6.3 test methods.

NOTE 3: Gloves meeting the requirements for resistance to puncture may NOT be suitable for protection against sharply pointed objects such as hypodermic needles.

NOTE 4: Each area where impact protection is claimed shall be tested. Due to the test method (test specimen dimensions), protection against impacts on fingers cannot be tested. When the requirements of the impact test are fulfilled by the gloves, the marking code 'P' is added after the five performance levels number, otherwise no code is added.

The sign X, instead of a number, means that the glove is not designed for the use covered by the corresponding test.
